

Breeze Park

**St. Louis, Missouri
2009**

PROJECT OVERVIEW

The interior designers at STLDA gave an existing residential care facility an amazing new look. All of the corridors, dining areas and lounges were updated with new finishes and furniture and art work. STLDA was also responsible for designing customized casework in several areas. New lighting was installed throughout the building to provide a brighter environment. The existing tub room was transformed from a plain institutional space into warm inviting spa.
