

St. William Apartments

**Dardenne Prairie, MO
2010**

PROJECT OVERVIEW

This 40 unit low income senior living apartment building is a joint effort of architect, St. Louis Design Alliance and developer Cardinal Ritter Senior Services. This structure is an integral architectural component of the proposed new "urbanist" downtown for Dardenne Prairie which promotes a compact site design. The multi-purpose room, chapel, and offices provide residents with public space. The exterior of the three story building is designed with brick and fiber cement siding creating a pleasant architectural rhythm.
